

# 18 WEIGHTS AND MEASURES. 63

As under the new Weights and Measures (Ireland) Act, which came into operation on the 1st inst., all farm produce must now be sold by weight and not by measurement, the following table, which has been specially prepared for us by a subscriber, will be useful to our readers. It shows at a glance the prices of Potatoes and Corn by the cwt., and stone in comparison with the old denomination of the barrel. For instance, Potatoes at 5s. per barrel would now be sold at 2s. per cwt., or three pence per stone; Wheat at 20s. per barrel would be equal to 8s. per cwt. or 1s. per stone, and so on. In the calculations fractions have been omitted, but otherwise they will be found to be perfectly correct:—

Potatoes.			Wheat.		
Barrel.	Cwt.	Stone.	Barrel.	Cwt.	Stone.
s. D.	s. D.	s. D.	s. D.	s. D.	s. D.

The End of Mr. HATTON's Tables.

# The Use of the TABLE of the PRICE of GOODS.

**T**HE Table foregoing is so plain, that it needs no Explanation. Some Examples of its Use take as follow, *viz.*

*Example 1.]* Admit you would know what 47 Pounds, Ells, Yards, or Ounces, &c. of any Commodity amounts to, at 7s. 9d. the Pound, Ell, &c. Look first for the Price of the Thing proposed, (as here 7s. 9d.) at the Top of the Table; then cast your Eye downwards, and under the words [*Value of*] you will find 47, right against which, towards the right hand, you will find 18l. 4s. 3d. and so much is the true Value of 47 Pounds, Ells, Yards, &c. of any thing at 7s. 9d. per Pound, Ell, Yard, &c.

*Example 2.]* Admit you would know the Value of some Number of Pounds, Ells, or any other Thing, which cannot be found at once in the Table; as suppose you would know what 751 Ells of Linen, &c. amounts to at 7s. 9d. per Ell: The Rule is, having found, as before, the price of the Ell at the Top of the Table, you will find under [*Value of*] 700, right against which, toward the right hand, you have the Value of 700 Ells,

	l	s.	d.	
which is — 271 :	271	5	0	}
And against 51 in that Co-				
lumn, under 7s. 9d. is	19	15	3	
So that the Value of 751 at				
7s. 9d. each is	291	0	3	

*Example 3.]* Admit the Value of the Unit of your Commodity or Merchandize is not just expressed in the Table (tho' I think there is scarce any thing bought and sold, whose Value is not therein;) as suppose you would know the Value of 56 Yards of Broad Cloth, at 12s. 5d. the Yard: Look for 12s. the Price of the Pound, Ell, Yard, Ounce, or other Thing, and against 56 you have

	l	s.	d.
33 : 12 : 0	33	12	0
And under 5d. and against 56 } you have — — —	1	3	4
The Sum of which for answer } is — — —	34	15	4

*Examp. 4.]* Admit you would find the Value of 7 C. 3 q. 25 lb. of any Commodity at any Rate;

# *The Use of the foregoing Table.*

Rate ; as suppose at 7s. 9d. per Pound, here you will find the Value of 1 Hundred, viz.

	<i>l.</i>	<i>s.</i>	<i>d.</i>
112lb. at 7s. 9d. to be	43	8	0
Which multiply by			7

And the Product is	303	16	0
--------------------	-----	----	---

The Value of 3q. (or 84lb.) at 7s. 9d. is	32	11	0
---	----	----	---

And the Value of the 25lb. is (at that rate)	9	13	9
--	---	----	---

The Sum for Answer is	346	0	9
-----------------------	-----	---	---

*Examp. 5.]* The farther Use of this Table is to find the Value of the Hundred Weight of any Thing, by knowing the Price of the Pound. Thus, if the Price of a Pound Weight is 7s. 9d. that of the Hundred (against 112lb. and under 7s. 9d.) will be found 43l. 8s. and so of any other. Or where the Value of the Pound is low, (as 6d. or less) the Value of the Hundred may be found by Memory, by this short Verse :

*As many Farthings as will buy a Pound,  
So oft (in th' Hundred Weight) is Two and Four-  
Pence found.*

Thus, if the Value of the Pound is 3d. Farthing, that is, 13 Farthings, that of the Hundred is 13 two Shillings, and 13 Groats, which is 30s. 4d. the Hundred ; and the reason of this is, because 112 Farthings is 2s. 4d.

*Examp. 6.]* By the foregoing Table you may likewise find the Value of the Pound (to a Farthing) by knowing the Value of the Hundred Weight : Thus, if the Value of the Hundred is 16s. 4d. Look for 16s. 4d. (or a number next thereto) against 112 included thus in a Parenthesis [112] and casting your Eye to the Top of that Column, you will find the Price of the Pound, &c. to be 1d. 3 Farthings.

*Examp. 7.]* The farther Use of this Table is to find how much of any Commodity at a Rate proposed, any Sum of Money will buy. Thus, if you would know how many Yards of Mullin of 6s. 3d. per Yard, 25l. will purchase : Look at the Top of the Table for 6s. 3d. and under that Rate

## The Use of the foregoing Table.

Rate look for 25*l.* in the Column of Pounds, Shillings, and Pence, and you have 80 in the Column towards the left hand, under [*Value of*] and so many Yards will the 25*l.* buy.

*Examp. 8.]* Or if you desire to know what any Sum will buy that is not just mentioned in the Table; as suppose you would know how many Ells of Holland of 6*s.* 3*d.* per Ell 100*l.* will buy: Look under 6*s.* 3*d.* for 100, as you did before for 25*l.* and you will find against 93*l.* 15*s.* (which is the next Number less than the 100*l.*) 300, then deduct 93*l.* 15*s.* from 100, and the Remainder is 6*l.* 5*s.* against which (or the number next less) you will find in the Table under the rate 6*s.* 3*d.* aforesaid 20; so that 100*l.* I find will buy 320 Ells, at 6*s.* 3*d.* each; and thus you may find any other to  $\frac{1}{4}$  or a Quarter of a Unit thereof. See the Margent.

<i>l.</i>	<i>s.</i>	<i>Ells.</i>
93	15	will buy 300
6	5	20
<hr/>		<hr/>
100	0	320

This Table reduceth any Number of Shillings, Pence or Farthings into Pounds, which is very useful to all Persons, especially such as understand not Division.

*Examp. 9.]* To reduce Farthings into Pounds.

In 75643 Farthings, how many Pounds Sterling? Under 1 Farthing,

	<i>l.</i>	<i>s.</i>	<i>d.</i>
Against 70000 is	72	18	4
5000	5	4	2
600	0	12	6
43	0	0	10 $\frac{1}{2}$
<hr/>			
75643	78	15	10 $\frac{3}{4}$

*Examp. 10.]* To reduce Pence into Pounds.

In 31839 Pence, how many Pounds?

Under 1 <i>d.</i> against 30000 is	125	0	0
1000	4	3	4
800	3	6	8
39	0	3	3
<hr/>			

Answer 31839 — 132 : 13 : 3

*Examp*

# *The Use of the foregoing Table.*

*Examp. 11.] To reduce Shillings into Pounds.*

Look for your Number of Shillings given to be reduced, under the Price [*One Shilling*] and right against the Shillings given, you have the Answer in Pounds, as before. This needs no Example.

*Examp. 12.] From what hath been shewed hitherto, this Table will be found very useful for the speedy working Questions in Barter: As if a Merchant hath Cotton Wool, 8C. 3q. 27lb. at 13 $\frac{3}{4}$ d. per Pound, which he is willing to barter with a Linen Draper for Fustians, viz. died Jeans at 14s. each End, white Jeans of 16s. per End, and Barmillians at 18s. per End; how many Ends of Fustian must the Draper give the Merchant for his Cotton Wool? Answer, 24 Ends of each Sort, and 1s. 10 $\frac{1}{4}$ d. in Money. See the Work.*

At 13 $\frac{3}{4}$ d. the Pound, 1C. (or 112lb.)

	<i>l.</i>	<i>s.</i>	<i>d.</i>
is worth —	6	8	4
Multiply by			8
<hr/>			
The Value of }	51	6	8
8C. is }			
3 Quarters —	4	16	3
27lb. is —	1	10	11 $\frac{1}{4}$
<hr/>			
So the Cotton }	57	13	10 $\frac{1}{4}$
Wool is worth }			

Now if the several prices of the Fustians are added together, the Sum is 48s.  $\frac{1}{3}$  of which is 16s. under which Price, and against 57*l.* 12*s.* (which is the next Number to 57*l.* 13*s.* 10 $\frac{1}{4}$ *d.*) you have 72,  $\frac{1}{3}$  of which is 24, which shews that the Draper must give the Merchant 24 Ends of each Sort of Fustians for his Cotton Wool.

*Examp. 13.] This Table is also useful in working Questions in Loss and Gain: As if a Merchant buyeth 849 Bundles of Yarn at 6s. 9d. per Bundle, and sells the same again at 9s. 6d. per Bundle, what does he gain thereby?*

The Difference in the Prices is 2*s.* 9*d.* and 849 times two Shillings and nine Pence by the Table is 116*l.* 14*s.* 9*d.* for Answer.

For.

*The Use of the foregoing Table.*

	<i>l.</i>	<i>s.</i>	<i>d.</i>
For 800 under 2 <i>s.</i> 9. is	110	0	0
49 ————— is	6	14	9

The Sum 849      Answer — 116 : 14 : 9

*Examp.* 14.] When the Price of the Unit of any Commodity is any Sum above 1*l.* and under 2*l.* the Value is found by the Table; thus, if you would find the Value of 84 died Jeans, &c. at 34*s.* 6*d.* per End.

	<i>l.</i>	<i>s.</i>	<i>d.</i>
For the 1 <i>l.</i> put down	84	0	0
Then look for 14 <i>s.</i> 6 <i>d.</i> at the the Top of the Table, and	60	18	0
against 84 you will find			
The Sum of which is the An- swer, viz.	144	18	0

D U B L I N:

Printed by SAMUEL POWELL and SON,  
in the Year, 1765.

T O  
Mr. JAMES SWIFT,  
MERCHANT  
I N

*Enslace-Street, DUBLIN.*

S I R,

THESE Tables were, in their Manuscript Copy, submitted entirely to your Judgment of them, which, after some perusal, You were pleased to give very favourably, and with a great Deal of Good Nature.

I beg Leave, Sir, now they are again printed, humbly to present them to You, as a publick, and I hope, lasting Acknowledgment of the great Favour you did Me, in recommending the first Edition so generously to the World, and also in obtaining for Me the Recommendation of the rest of the Bankers, and of several eminent Merchants in *Dublin*.

*I am, with the greatest Respect,*

*S I R, Your most Obliged,*

*and most Faithful,*

*Humble Servant,*

JOHN WATSON.

# EXPLANATION.

**T**H E Method of using these Tables is this. Suppose I wanted to Exchange 75*l.* 10*s.* 6*d.* *English* Money into *Irish*, at 8 and 3 Quarters *per Cent.* I turn over the Book in the first Part, of *English* Money Exchanged into *Irish*, till I come to the Page of 8 and 3 Quarters: And there I find that

	<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>f.</i>
'70 <i>l.</i> is	76	2	6	0
'5 <i>l.</i> is	5	8	9	0
'10 <i>s.</i> is	0	10	10	2
6 <i>d.</i> is	0	0	6	2
The Answer is	<u>71</u>	<u>12</u>	<u>2</u>	<u>8</u> 0

Or any Sum of *Irish* Money may be exchanged into *English*, by turning to the Second Part after the same Manner.

Only Observe that wherever this Mark ' is prefixed to any Sum, there is no manner of Fraction in the Exchange thereof.

But in every other Line, through these Tables of Exchange, there is understood to be wanting some Part or Fraction of a Farthing, perhaps half a Farthing, or less than half a Farthing, or it may chance to be very near a Farthing.

And therefore, there must be some Allowance made for the Fractions that are wanting, in taking out the Exchange of any Sum, where there are 3 or 4 such Lines.

Example. I have 54*l.* 12*s.* 6*d.* *Irish*, to be Exchanged into *English* Money at 9 and a Quarter.

	<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>f.</i>
50 <i>l.</i> is	45	15	3	3
4 <i>l.</i> is	3	13	2	2
12 <i>s.</i> is	0	10	11	3
6 <i>d.</i> is	0	0	5	1
The Answer is	<u>48</u>	<u>19</u>	<u>11</u>	<u>1</u>

But, because in every one of these Lines there is a Fraction wanting, which I know by Inspection, none of them having any such Mark: Therefore, in the 4 Lines, I might have lost very near 4 Farthings, but not quite so much. As it happens, there are in this Example three Farthings lost, for the true Answer is 50*l.* *English*.

But the Difference in any Example will never amount to Two Pence.

End of the Tables of Exchange.

---

T A B L E S  
O F  
C O M M I S S I O N,

At the several Rates mostly used in  
*Ireland, viz. from One eighth, to  
Two and Five eighths per Cent.*

---

Calculated by JOHN WATSON, Bookseller.

---

N. B. Wherever this Mark ‘ is prefixed to  
any Sum, there is no Fraction wanting in  
the Commission thereof.

---

End of Interest at 6 per Cent.

*Some small Mistakes in the Printing.*

**I**N the Price of Goods, and Page of Twelve Pence, Opposite the N<sup>o</sup> 49 in the Margin, the Figure of 2 in 2*l*. inverted.

In the Page before the Title of the Exchanges, and the first Line, For 2*s*. 9. Read 2*s*. 9*d*.

English Exc. at 10 $\frac{1}{4}$ . At '4*d*. and '8*d*. in the Margin, *Leave out* the Comma's.

English Exc. at 10 $\frac{1}{2}$ . At 14*s*. in the Margin, the Figure 2 inverted in the Answer, 15*s*. 5*d*. 2*d*.

Irish Exc. at 6 $\frac{1}{4}$ . Add a Comma to 17*s*. in the Margin. Make it thus '17.

The following more material Mistakes are mended with a Pen.

**E**NGLISH Exc. at 7 $\frac{7}{8}$ . At 18*s*. in the Margin, For 10*s*. 5*d*. It is made now 19*s*. 5*d*.

Commission at  $\frac{1}{2}$ . In the Margin, '700 and '800, are made '800. '700.

Interest of 4*l*. for 11 Days, at 4 *per Cent*. is made 1 Penny.

Interest of 300*l*. for 21 Days, at 5 *per Cent*. is made 17*s*. 3*d*.
